A photograph of a large warehouse interior. The view is looking down a long aisle between tall metal shelving units. The shelves are filled with numerous cardboard boxes, some stacked high. The ceiling is high with a complex network of metal beams and bright overhead lights. The perspective creates a strong sense of depth and scale.

[illegible]

The screenshot displays the EverZone Warehouse dashboard. At the top left is the EverZone logo. The main heading is 'EverZone Warehouse'. Below this, there are two charts and a list of items.

Sales (millions)

This chart shows sales data for the years 2002, 2003, 2004, and 2005. The y-axis ranges from 0 to 1.6. The x-axis shows months from January to December. Data points are plotted for each month, with a general upward trend over the years.

Monthly Sales Forecast

This chart shows the monthly sales forecast for the year 2005. The y-axis ranges from \$0 to \$100 million. The x-axis shows months from January to December. The forecast shows a significant peak in November and December, reaching nearly \$100 million.

Shipping Cost

This chart shows the shipping cost for the year 2005. The y-axis ranges from \$0 to \$100 million. The x-axis shows months from January to December. The cost shows a significant peak in November and December, reaching nearly \$100 million.

The screenshot displays the 'EverZone Warehouse' dashboard. On the left, a 'Select Order Year' dropdown is set to '2017'. Below it, a legend indicates that red represents 'Critical', yellow represents 'Low', green represents 'Med', and blue represents 'High'. The main area features a 'Order Priority Path' network diagram. This diagram shows a central 'Warehouse' node connected to various 'City' nodes (Atlanta, Dallas, Denver, Houston, Los Angeles, Miami, New York, Phoenix, Portland, San Francisco, Seattle, Tampa, Washington). The connections are color-coded by priority: red for Critical, yellow for Low, green for Medium, and blue for High. A legend at the bottom of the diagram identifies the colors: Critical (red), Low (yellow), Med (green), and High (blue). To the right of the network diagram is a bar chart titled 'Order Quantity by Order Priority'. The chart shows the quantity of orders for each priority level: High (14,000), Low (14,000), Med (14,000), Critical (14,000), and Other (14,000). The Y-axis is labeled 'Quantity' and ranges from 0 to 14,000. The X-axis is labeled 'Order Priority'.
